WHY CHOOSE AN ENTRANCE[®] COMPOSITE DOOR?

Low Maintenance - Impact resistant GRP skins replicate the grain of an oak tree creating a natural look. Our extensive range of colours are resilient against UV damage giving you a 10 year surface finish guarantee.

Unique to You - With an array of colours from Standard to Stained, Premium to Painted, you can truly make your door unique to your taste. We offer a wide range of frame colour options and we even can paint your frame the same colour as your door!

All in the Detail - From our triple-glazed glass designs to our door handles and furniture, Entrance carefully pick the finest range of products to compliment our doors. Recently, we have worked with our suppliers to match our Rose Gold furniture to tie in with exclusive glass designs containing Rose Gold coming to finish your door to the highest of standard.

Superior Security - Our doors have been tested to and passed the rigours of PAS 24 security testing. Each door is supplied with a Winkhaus lock independently approved by the 'Secured by Design' policing initiative known for their knowledge in quality and security, paired with the Brisant Ultion 3 Star security cylinder with a £2,000 Guarantee to the homeowner against burglar attacks (see page 7).

Structural Strength - The internal frame of the door is manufactured from laminated timber which prevents any twisting and warping, giving you the benefits of a Composite but look of a Timber door, resulting in a 10 year structural guarantee.

Thermal Efficiency - With a high-density, foam insulated core, our composite doors have been proven to be 19% more thermally efficient than 48mm solid timber core composite doors, and 17% more than your traditional timber door. Our doors help keep the heat locked inside your home by preventing heat escaping through your door, therefore decreasing the energy loss and costs!

LEAVE YOUR WORRIES AT THE DOOR

First and foremost, at Entrance Composite Door Solutions we provide your home with the security you and your family need. Our doors have been independently tested to exceed the requirements of PAS24 – the UK security standard for external doors; and are Part Q compliant.

The Entrance Composite Door leaf is a hybrid GRP Composite, comprising of an impact resistant, 2mm GRP skin, an LVL and Timber frame structure and filled with a insulated foam core containing a security board.* It has been tested to PAS24 regulations and excelled at the cut through test proving the utmost security for your home.

At Entrance Composite Door Solutions, we want nothing but the best for our doors on your home. We class all of our GRP doors as enhanced security as they are fitted and supplied with German manufactured Winkhaus multipoint locking systems along with high security Brisant 3 Star Kitemark Cylinders with £2,000 Guarantee against burglar attacks, giving you peace of mind that an Entrance door is the best way to secure your home with the most reliable security options in the market.

For Lock & Hardware options please see pages 64-68, featuring our NEW AV3 locking system

*Some door styles have a 4mm security skin whereas other door styles contain a security board inserted in the centre of the door.

SECURITY AS STANDARD

As standard, Entrance® composite doors come complete with an impressive range of high security features.

Manufactured in Germany, our multipoint locking system features two compressing security hooks and a central deadbolt to provide high levels of both security and weather performance. To further enhance this security your home will be protected by the industry leading Brisant Ultion 3 star Security Cylinder.

With an extensive range of handle colours and complimentary door furniture including knockers and letterplates you can dress your door to meet your desires.
